

Section 1: Data Encryption

All data stored in VortexIQ is encrypted at rest using AES-256 encryption.

All data transmitted between clients and VortexIQ servers uses TLS 1.3.

Encryption keys are managed using AWS KMS with automatic annual rotation.

Database backups are also encrypted using the same AES-256 standard.

Encryption cannot be disabled and applies to all plans including Free.

Section 2: Compliance Certifications

VortexIQ is SOC 2 Type II certified with annual audits by a third party.

VortexIQ complies with GDPR for all users in the European Union.

VortexIQ complies with CCPA for users in California.

ISO 27001 certification is in progress and expected by Q4 2026.

HIPAA compliance is available on Enterprise plans with a signed BAA.

Compliance reports and certificates are available on request at security@vortexiq.com.

Section 3: Access Controls

VortexIQ uses role-based access control for all workspace resources.

Admins can restrict project access to specific team members.

All user actions are logged in an immutable audit trail.

Audit logs are retained for 12 months on Pro and 7 years on Enterprise.

IP allowlisting is available on Enterprise plans to restrict login locations.

Single sign-on with SAML 2.0 is supported on Pro and Enterprise plans.

Section 4: Incident Response

VortexIQ has a dedicated security team available 24 hours a day.

Security incidents are classified as P1 P2 or P3 by severity.

P1 incidents affecting data security are responded to within 1 hour.

Affected users are notified within 72 hours of a confirmed data breach.

Post-incident reports are shared with Enterprise customers within 7 days.

To report a security vulnerability email security@vortexiq.com.

Section 5: Penetration Testing

VortexIQ undergoes annual penetration testing by certified third parties.

Results are reviewed by the security team and critical findings fixed within 30 days.

Bug bounty program is available at security.vortexiq.com/bounty.

Rewards range from 100 to 10000 dollars depending on severity.

Section 6: Data Residency

By default all VortexIQ data is stored in EU-based AWS data centers.

US data residency is available for Enterprise customers on request.

Data residency region cannot be changed after workspace creation.

Sub-processors used by VortexIQ are listed at vortexiq.com/sub-processors.

Section 7: User Privacy

VortexIQ does not sell or share user data with third parties for advertising.

Usage analytics are collected anonymously to improve the product.

Users can opt out of analytics from Settings then Privacy.

VortexIQ employees cannot access customer workspace data without explicit consent.

Data access by VortexIQ staff requires a support ticket from the workspace owner.

To request data deletion contact privacy@vortexiq.com.
